Summary

Computer Science student learning backend development, developer tooling and applied machine learning through hands-on projects in Java, Python and TypeScript.

Education

College Present
PSG College of Technology, M.Sc. Software Systems (Integrated) CGPA: 9.18 / 10

XII (Higher secondary, State board) 2024
S.B.O.A Matric. Hr. Sec School, Coimbatore Percentage: 95.6 %

X (SSLC, State board) 2022
S.B.O.A Matric. Hr. Sec School, Coimbatore Percentage: 92.6 %

Technical Skills

Languages: Python, Java, TypeScript, JavaScript, C++, C
Frameworks: Spring Boot, Node.js, Express.js, React.js, Socket.IO
Data & ML: PyTorch, NumPy, Pandas, Scikit-learn, SciPy, Matplotlib, Streamlit
Databases: PostgreSQL, MongoDB, Oracle
Concepts: REST APIs, JWT Authentication, RBAC, WebSockets, Static Analysis, Time-Series Forecasting
Platforms & Tools: Linux, Git, GitHub Actions, Docker, Postman

Projects

CodeAtlas | github.com/shrishaanth/CodeAtlas | Live demo
Java 17, Spring Boot, Tree-sitter, JGit, PostgreSQL, React, TypeScript, Docker

- Turns a repository's code and git history into a reading order, ownership map, hotspots and findings.
- Tree-sitter parsing and JGit history mining; every number traces back to a file, line or commit.
- Citation-checked Q&A; symbol search finds the named definition in the top 8 results 98–100% of the time.

Axon | github.com/shrishaanth/Axon
Java 17, Maven, PostgreSQL, OpenAPI, React, TypeScript, Docker

- Ranks breaking changes between two OpenAPI versions by the clients that real traffic shows are affected.
- Usage-aware ranking: Kendall's tau 0.69 with the true affected-client count vs. -0.03 for spec-only.
- CI gate fails PRs that break 10%+ of active clients; ingests 4,700 events/s; tested on 200 real API pairs.

Taskify.io | github.com/shrishaanth/Taskify.io | Live demo
TypeScript, React, Node.js, Express, MongoDB, Socket.IO

- Multi-tenant Kanban app with DB-enforced tenant isolation and two-layer RBAC re-checked on every request.
- Real-time sync via room-scoped Socket.IO events; JWT auth with rotating, revocable refresh tokens.
- 761 automated tests (247 server, 514 client), led by a cross-tenant isolation suite.

SurgeMap | github.com/shrishaanth/SurgeMap
Python, PyTorch, NumPy, Pandas, Scikit-learn, Streamlit

- Graph WaveNet forecasting taxi demand across 258 NYC zones at 5/15/30/60-minute horizons.
- Beats gradient boosting by 3.3–5.9% and persistence by 23–35% RMSE at every horizon.
- Simulated fleet repositioning on these forecasts cuts mean rider wait from 7.6 to 5.3 min at 2,000 vehicles.

Extracurriculars & Hobbies

Drawing: freehand pencil sketching, studying light, shadow and proportion in everyday objects.
Photography: casual photography, exploring composition and lighting in everyday scenes.
