# Shrishaanth U

github.com/shrishaanth | linkedin.com/in/shrishaanth-dev | shrishaanth-portfolio.vercel.app
shrishaanth2024@gmail.com | +91-7010048373 | Coimbatore, India

## Summary

Computer Science student learning backend development, developer tooling and applied ML in Python and Java.

## Education

**M.Sc. Software Systems (Integrated)** 2024 – Present
*PSG College of Technology, Coimbatore* CGPA: 9.18/10

**Class XII, Higher Secondary (State Board)** 2024
*S.B.O.A Matric. Hr. Sec. School, Coimbatore* Percentage: 95.6%

**Class X, SSLC (State Board)** 2022
*S.B.O.A Matric. Hr. Sec. School, Coimbatore* Percentage: 92.6%

## Technical Skills

**Languages:** Python, Java, SQL, JavaScript, C++, C
**Frameworks:** Spring Boot, Node.js, Express.js, React.js
**Databases:** PostgreSQL, MySQL, MongoDB
**Tools:** Git, GitHub Actions, Docker, Postman

## Projects

**CodeAtlas** | github.com/shrishaanth/CodeAtlas Sep 2026

- Built a repository-analysis platform in Spring Boot and PostgreSQL that parses code with Tree-sitter and mines git history with JGit to produce reading order, ownership, change coupling, hotspots and findings; 138 tests.
- Replaced the first reading-order formula after a held-out evaluation on 20 repositories showed it lost to sorting by file size; the tuned version scored 0.69 vs. 0.67 for file size and commit count.
- Raised code Q&A definition retrieval to 98–100% in the top 8 by fixing AND-combined search terms and a per-file cap, and verified every LLM citation against the retrieved excerpts.

**Axon** | github.com/shrishaanth/Axon Oct 2026

- Built an API change-impact tool in Java 17, Spring Boot and PostgreSQL that ranks breaking OpenAPI changes by the clients that observed traffic shows are affected.
- Defined the evaluation before running it: the ranking scored Kendall's tau 0.69 vs. 0.48 for traffic volume and -0.03 for spec-only on 100 held-out populations; published a 73% match with oasdiff.
- Stored traffic as order-independent counters so a 1M-event replay matched live ingestion exactly (4,700 events/s); shipped a CI gate, a field-shape sanitiser and a React UI; 70+ tests.

**Taskify.io** | github.com/shrishaanth/Taskify.io Feb 2026 – Mar 2026

- Built a multi-tenant Kanban platform in React, TypeScript, Express and MongoDB with organisation and project roles, and guards on edge cases like removing the last owner; 761 tests.
- Synced boards live via Socket.IO rooms per organisation, project and board, with optimistic drag-and-drop that rolls back if the server rejects the change.
- Secured sessions with atomically rotated, hashed refresh tokens; a reused token signs the user out everywhere, and tabs share one refresh through Web Locks.

**SurgeMap** | github.com/shrishaanth/SurgeMap Aug 2026 – Oct 2026

- Built a Graph WaveNet that forecasts taxi pickups for 258 NYC zones 5–60 minutes ahead from 13M trips, beating tuned gradient boosting by 2.4–3.4% RMSE (4–7% in surges) and persistence by 23–35%.
- Traced inflated early results to a truncated source file, rebuilt the pipeline on official TLC data with chronological splits, and used ablations to find what actually mattered.
- Built a fleet simulator with an LP repositioning policy that cut unmet requests from 42.8% to 26.5% at 2,000 vehicles; packaged as a 16-command CLI with 99 tests.

## Extracurriculars & Hobbies

**Drawing:** freehand pencil sketching, studying light, shadow and proportion in everyday objects.
**Photography:** casual photography, exploring composition and lighting in everyday scenes.
